Meniscal matrix programs across cohorts

Human meniscus

GSE220243
13 donors

HRA001986
8 donors

Gene structure

31/50 genes shared
Jaccard = 0.449

Disease association

HRA comparison
FDR threshold not met

Synovial cohorts
Inconsistent direction

Matched-budget sampling and donor-omission refits

Recurring gene structure does not establish disease replication.
